

CONTENTS

Vol. 42 No.1 March 2011 - Part I General Papers

1. Some Issues in Geosynthetic Reinforced Walls and Slopes
by D. Leshchinsky
2. Advance in Geogrid Reinforced Slopes in Malaysia
by T.A. Ooi and C.H. Tee
3. Embankment Construction with Saturated Clayey Fill Material Using Geocomposites
by J.-C. Chai, T. Hino, Y. Igaya, and Y. Yamauchi
4. Numerical Modeling of Geosynthetic-Reinforced Earth Structures and Geosynthetic-Soil Interactions
by J. Huang, A. Bhandari, and X. Yang
5. Geosynthetic Tubes and Geosynthetic Mats: Analyses and Applications
by J. Chu, W. Guo, and S.W. Yan
6. Performance-based Design for Geosynthetic Liner Systems in Landfills
by Y.M. Chen, W.A. Lin, B. Zhu, and L.T. Zhan
7. Quantifying the Influence of Geosynthetics on Performance of Reinforced Granular Bases in Laboratory
by J. Han, Y. Zhang, and R.L. Parsons

Vol. 42 No.2 June 2011 - Part I General Papers

1. Field Measurements on Piled Rafts with Grid-Form Deep Mixing Walls on Soft Ground
by *Kiyoshi Yamashita, Junji Hamada and Takeshi Yamada*
2. Static Axial Reciprocal Load Test of Cast-in-place Nodular Concrete Pile and Nodular Diaphragm Wall
by *K. Watanabe, H. Sei, T. Nishiyama and Y. Ishii*
3. Vertical Load Test and Settlement Analysis of Cast-in-place Concrete Nodular Piles Supporting a High-Rise Building
by *N. Suzuki and T. Seki*
4. Extended Use of Spring Hammer Rapid Load Testing
by *K. Matsuzawa and T. Matsumoto*
5. Push-up Load Tests Using Uncrushable Particles and Its DEM Analyses
by *SuriyahThongmunee, Shun-ichi Kobayashi and Tatsunori Matsumoto*
6. On Design and Construction of Pile Group Foundation of Taipei 101
by *Ching-Han Yu*
7. Capacity versus Deformation Analysis for Design of Footings and Pile Foundations
by *Bengt H. Fellenius*
8. Pile Raft Foundations for Tall Buildings
by *H.G. Poulos, J.C. Small and H. Chow*
9. Foundation Design of the 151 Story Incheon Tower in a Reclamation Area
by *Ahmad Abdelrazaq, Frances Badelow, Sung Ho-Kim, Harry G. Poulos*

Vol. 42 No.3 September 2011 - Research Papers

1. Building Damage Assessment for Deep Excavations in Singapore and the Influence of Building Stiffness
by K.H. Goh and R.J. Mair
2. Concept and Design Methodology of Redundancy in Braced Excavation and Case Histories
by G. Zheng, X.S. Cheng, Y. Diao, and H.X. Wang
3. Three-Dimensional Deformation Behavior of an Over-sized Excavation in Shanghai Clay
by Y. M. Hou, J. H. Wang and D-S. Jeng
4. Numerical Study on the Movement of Existing Tunnel Due to Deep Excavation in Shanghai
by J. J. Chen, J. H. Wang, G. W. Xiang, S. L. Wen, and Y. Du
5. Observed Performance of Diaphragm Wall Construction
by C.Y. Ou and L.L. Yang
6. Performance of Construction with New Pneumatic Caisson Method in Shanghai Soft Ground
by F.L. Peng and H.L. Wang
7. Technologies of Micro-disturbance Construction of Pipe-Jacking
by W. Q. Ding, B. Li, S. L. Yuan and J. K. Ge
8. Design and Construction of InJe Tunnel, the Longest Road Tunnel of Korea
by S. M. Cho, S. D. Lee, and Y. J. Kwon

Vol. 42 No.4 December 2011 - Research Papers

1. Dilation and Stability of Sand in Triaxial Tests
by A. Sawicki
2. The Strength Anisotropy of a Residual Soil in Singapore
by G. Meng and J. Chu
3. Effect of Boundary Conditions on Shear Banding in True Triaxial Tests on Sand
by P.V. Lade and Q. Wang
4. Behavioural Patterns of Fine Sands
by V.N. Georgiannou
5. Simulating Shear Rate-Dependent Undrained Stress-Strain Behaviour of Natural Sedimentary Clay at Kobe Airport
by M.-S. Jung and S. Shibuya
6. Experimental Investigation on Settling Behavior of Hong Kong Marine Deposits in Settling Column Condition
by F. Tong J.H. Yin and G.F. Zhun
7. Development of a Hollow Cylinder Torsional Apparatus for Pre-failure Deformation and Large Strains Behaviour of Sand
by E. Ibraim, P. Christiaens and M. Pope
8. Effect of High Confining Pressure on the Behaviour of Fibre Reinforced Sand
by S. Ud-din, A. Marri and D. Wanatowski

Technical Note

1. A Comment on the Ratio of the Maximum and Minimum Dry Density for Sand
by E. Imre, S. Fityus, E. Keszezyne and T. Schanz
