

# CONTENTS

## **Vol. 43 No.1 March 2012**

1. Some Applications Of Unsaturated Soil Mechanics In Thailand: An Appropriate Technology Approach  
by W. Mairaing, A. Jotisankasa and S. Soralump
2. Calculation Of Heave Of Deep Pier Foundations  
by J.D. Nelson, K.C. Chao, D.D. Overton and R.W. Schaut
3. In-Situ And Laboratory Investigations Of Stress-Dependent Permeability Function And SDSWCC From An Unsaturated Soil Slope  
by C. W. W. Ng and A. K. Leung
4. Measurements Of Shrinkage Induced Pressure (Sip) In Unsaturated Expansive Clays  
by A.J. Puppala, T. Wejrungsikul, V. Puljan and T. Manosuthikij
5. Unsaturated Soil Mechanics For Slope Stabilization  
by H. Rahardjo, A. Satyanaga, E. C. Leong
6. The Development Of Unsaturated Soil Mechanics At Imperial College, London  
by J.R. Standing
7. Climate Change And The Role Of Unsaturated Soil Mechanics  
by D.G. Toll, J. Mendes, P.N. Hughes, S. Glendinning and D. Gallipoli
8. Some Mining Applications Of Unsaturated Soil Mechanics  
by D.J. Williams

## **Vol. 43 No.2 June 2012**

1. Proposed Changes to the Geotechnical Earthquake Engineering Provisions of the Bangladesh National Building Code  
by *Tahmeed M. Al-Hussaini, Tahsin R. Hossain and M. Hayeem Al-Noman*
2. Analysis of Soil Liquefaction during the Recent Canterbury (New Zealand) Earthquakes  
by *RP Orense, MJ Pender and LM Wotherspoon*
3. Numerical Simulation of Seismic Slope Stability Analysis based on Tension-Shear Failure Mechanism  
by *Yingbin Zhang, Guangqi Chen, Jian Wu, Lu Zheng, Xiaoying Zhuang*
4. A Real-time Prediction Method for Regional Rainfall-induced Geohazards in Post-earthquake Region of Wenchuan Earthquake  
by *Z. Yang, J. Qiao, H. Tian, D. Huang, M. Wang and H. Meng*
5. Effects of Anisotropic Consolidation and Stress Reversal on the Liquefaction Resistance of Sands and Silty Sands  
by *Abbas Galandarzadeh and Alireza Ahmadi*
6. Characteristics of Slope Failures During Natural Disasters Considering Geographical Features and Groundwater Level: Case Study of the Chuetsu Region of Niigata, Japan  
by *H. Toyota*
7. Overview of the Geotechnical Damages and the Technical Problems Posed after the 2011 off the Pacific Coast of Tohoku Earthquake  
by *M. Kazama, T. Noda, T. Mori and J. Kim*
8. Development of Potential Map for Landslides Induced by the Chi-Chi Earthquake Using Instability Index  
by *Meei-Ling Lin and Yu-Hung Shu*

*Technical Notes:*

9. Geotechnical Hazards with Emphasis on Seismically-Combined Effects on Slopes  
by *Ikuo Towhata*
10. Monitoring on Earthquake Induced Landslide – A Case Study in Northwest Chengdu, China  
by *Hongling Tian, Jianping Qiao, Taro Uchimura and Lin Wang*

**Vol. 43 No.3 September 2012**

1. Waste/Lining System Interaction: Implications for Landfill Design and Performance  
by N. Dixon, K. Zamara<sup>1</sup>, D.R.V. Jones and G. Fowmes
2. Wrinkling of a Geomembrane on a Compacted Clay Liner on a Slope  
R. K. Rowe, P. Yang, M.J. Chappel, R.W.I. Brachman, W.A. Take
3. Diffusion of phenolic compounds through an HDPE geomembrane  
by N. Touze-Foltz, M. Ahari, M. Mendes, C. Barral, M. Gardoni and L. Mazeas
4. Shear-Induced Geomembrane Damage due to Gravel in Underlying Compacted Clay  
by P. J. Fox, C. Athanassopoulos, S. S. Thielmann, and A. N. Stern
5. Evaluation of mineral barriers against acid rock drainage  
by A. Naka, T. Katsumi, G. Flores, T. Inui, T. Ohta, T. Urakoshi, and T. Ishihara
6. Improvement on the Performance of Geosynthetic Clay Liners Using Polymer Modified Bentonite  
by Y. Liu, W. P. Gates and A. Bouazza
7. Effect of Settlement rate and Geogrid reinforcement on the Deformation Behaviour of Soil barriers of Landfill Covers: Centrifuge Study  
by S. Rajesh and B.V.S. Viswanadham
8. Effect of differential settlements on the sealing efficiency of GCLs compared to CCLs: Centrifuge Study  
by B.V.S. Viswanadham, S. Rajesh and A. Bouazza
9. Geosynthetic Lining System for Modern Waste Facilities – Experiences in Developing Asia  
by H. B. Ng and B. Ramsey
10. The Use of Geosynthetics in Major Metropolitan Landfills in Perth, WA – Two Case Studies  
by L. Du Preez, R. Beaman and I. Watkins

**Vol. 43 No.4 December 2012**

1. Evaluation of existing CPT correlations in silt  
by A. S. Bradshaw, A. C. Morales-Velez and C.D.P. Baxter
2. Characterisation of quick clay at Dragvoll, Trondheim, Norway  
by A. Emdal, M. Long, A. Bihs, A. Gylland and N. Boylan
3. Field response of push-in earth pressure cells for instrumentation and site characterization of soils  
by Alan J. Lutenege
4. Frequent-interval SDMT and continuous SCPTu for detailed shear wave velocity profiling in soils  
by T. Ku and P.W. Mayne
5. In situ testing of peat – a review and update on recent developments  
by M. Long and N. Boylan
6. Understanding the stiffness of soils in Singapore from pressuremeter testing  
by K.H. Goh, K. Jeyatharan and D. Wen

7. In situ measurement of hydraulic conductivity of saturated soils  
by *D.J. DeGroot, D.W. Ostendorf and A.I. Judge*
8. Rate effect on cone penetration test in sand  
by *F. A. B. Danziger and T. Lunne*
