

CONTENTS

Vol. 48 No.1 March 2017

1. Geo-disasters in Japan in the Context of Climate Change
By K. Yasuhara, S. Kawagoe and K. Araki
2. Climate change impacts in a large-scale erosion coast of Hai Hau district, Vietnam and the adaptation
By Do Minh Duc, Nguyen Manh Hieu and Nguyen Chau Lan
3. Subsidence and shoreline retreat in the Ca Mau Province – Vietnam: Causes, consequences and mitigation options
By K. Karlsrud, B.V. Vangelsten and R. Frauenfelder
4. Rainfall Erosivity Variability for Penang Island
By A. S. Yahaya, F. Ahmad , Z.A Mohtar and S. Suri
5. Influence of increased precipitation on the transient seepage through levees during flood events
By A. Scheuermann, J. Brauns and A. Bieberstein
6. Use of Low Carbon and Low Cost (LC2) Materials in Climate Change Adaptation Measures
By H. Hazarika
7. Performance Monitoring of Bridge Foundations under Multi-hazards
By W. F. Lee, C. I. Yen and C. K. Huang
8. Analysis and Simulations of Flood Control Dikes and Erosion Protection Schemes using PLAXIS FEM 2D and SLIDE Softwares
By N. Chanmee, D.T. Bergado, T. Hino and L.G. Lam
9. Arresting rainfall-induced red soil run off in a farmland by inhibitory adaptation measures
By K. Araki, N. Yasufuku, K. Iwami, K. Okumura, K. Omine and K. Vilayvong
10. Iron and Steel Slag Properties and Mechanisms for Carbon Dioxide Fixation in a Low- carbon Society
By M. Umino, H. Komine, S. Murakami, K. Yasuhara, K. Setoi and Y. Watanabe
11. Development of Gross National Safety Index for Natural Disasters
By O. Kusakabe, M. Kikumoto, K. Shimono, K. Itoh, H. Inagaki, S. Ohsato and K. Watanabe
12. Flooding Hazards and Potential Risks due to Heavy Rain and Sea Level Change in Shanghai, China
By Y. Yuan, Y. S. Xu and S.L., Shen
13. Modeling impact of future climate on stability of slope based on general circulation model
By S. Soralump and T. Chaithong
14. Geotechnical Measures for Uttarakhand Flash Flood-2013, India
By C. Ghosh and I. Pal

Vol. 48 No.2 June 2017

1. Deep Excavations in Taipei Metro Construction
by R. N. Hwang and Z. C. Moh
2. Development of Reinforced Concrete Segmental Lining Design for MRT Bored Tunnels in Singapore
by D. Wen
3. Geology and Its Impact on the Construction of Singapore MRT Circle Line
by Jeyatharan Kumarasamy

4. Constructing the Cut-and-Cover Tunnels and Bored Tunnels of the Singapore Downtown Line
by K.H. Goh and Y. Zhang
5. Bored Tunnelling Directly below Buildings in Singapore Downtown Line
by K.H. Goh, S. S. Ng and K.S. Ho
6. Application of Gravity Survey in Urbanized City Environment
by Charles Im, John Davies, Frank Collar and Seng Tiok Poh
7. Water Sealing by Wire Brush with Grease for Pneumatic Caisson Method at Great Depth Underground
by M. Kawasaki, K. Yoshizaki and M. Sugimoto
8. Geotechnical Challenges of Kolkata Metro Construction
by N. Som
9. Use of Pressure Relief Wells to Optimise Ground Improvement Layer Thickness in Deep Excavations
by Gerardo Agustin Pittaro
10. Bukit Timah Granite Formation Engineering Properties and Construction Challenges
by C. Veeresh and K.H. Goh
11. 41 Years of Mass Transit Underground Railways
by L.J. Endicott
12. Simulation of H&V Shield Behavior at Sharp Curve by Kinematic Shield Model
by T. N. Huynh, H.V. Pham, M. Sugimoto, Y. Tanaka, H. Ohta and K. Yasui
13. Comparison of the Effect of Fine Content and Density towards the Shear Strength Parameters
by Badee Alshameri, Aziman Madun and Ismail Bakar
14. Shaft Resistances of Jacked Open-ended PHC Pipe Piles
by Xiao-long Zhou, Hai-lei Kou, Chang-hong Li
15. Estimation of Shrink / Swell Potential and Variability of Clays by Small-Scale Suction Tests
by P. R. Stott and E. Theron
16. Pullout Tests on Strips with Anchorage Elements under Low Stresses
by M. R. Selamat, M. H. Roslan, and M. A. M. Ismail
17. Numerical Simulation Analysis and In-situ Monitoring of Long, Narrow and Deep Foundation Pit
by Changhong Li, Xiaolong Zhou, Long Zhang, Xiaoming Wei and Wanling Li

Vol. 48 No.3 September 2017

1. Challenges and Recommendations for Steel H-Piles Driven in Soft Rock
By K. Ng and T. Sullivan
2. Experimental Study on Pile Foundations having Batter Piles Subjected to Combination of Vertical and Horizontal Loading at 1-g Field
by Anh-Tuan Vu, Tatsunori Matsumoto, Shun-ichi Kobayashi and Shinya Shimono
3. Fundamental Experiments on a Reinforcement Method using Sheet Pile Wall for Bridge Pile Foundations Subjected to Pile Embedment Reduction and Numerical Validation
by T. Tikanta, T. Matsumoto, A. T. Vu, S. Kobayashi, S. Shimono and C. Bamrungwong
4. Numerical Studies on Performance of Offshore Wind Turbine Composite Suction Pile in Sand Subjected to Combined Loading
by San-Shyan Lin, Yun-Chih Chiang, Xin-Hua Lin, Hsing-Yu Wang, and Sung-Shan Hsiao
5. Pile Group Interaction Based on Field Monitoring and Load Tests
by K. Yamashita, S. Wakai, J. Hamada and T. Tanikawa

6. In-situ Full Scale Load Tests and Reliability Evaluation of Bearing Capacity for Nodular Cast-in-place Concrete Pile
by *K. Watanabe, A. Mitsumori, H. Nishioka and M. Koda*
7. Development of Steel Pipe Pile Combined with Ground Improvement in Narrow Spaces
by *K. Watanabe, T. Yamamoto and T. Sudo*
8. Design and Analysis of Composite Foundation for High-rise Buildings
by *K. Watanabe, N. Suzuki and M. Sahara*
9. Pervious Material Made from Landslide Debris for Road Base Construction
by *Hung-Jiun Liao, Chin-Lung Chiu, Chung-Kuang Chien, Yi-En Tang, Heng-Chih Cheng*
10. Advances in Numerical Modelling of Different Ground Improvement Techniques
by *E. Heins, K.-F. Seitz, A. Chmelnizkij, M. Milatz and J. Grabe*
11. Load Sharing Mechanism of Combined Pile-Raft Foundation (CPRF) under Seismic Loads
by *Ashutosh Kumar and Deepankar Choudhury*
12. Deflection Behaviour of GFRP Bar Reinforced Concrete Passive Bored Pile in Deep Excavation Construction
by *J. L. Zhou, E. Oh, X. Zhang, M. Bolton, H. Y. Qin and L. Zhang*
13. Loading and Dynamic Response Considerations for the Design of Wind Turbine Foundations on South African Soils
by *Byron Mawer, Denis Kalumba, Charles Warren-Codrington*
14. Comparison of Numerical Analyses of Behaviour of Column-Reinforced Foundations
by *Mounir Bouassida, Mnaouar Klai, Seifeddine Tabchouche And Mekki Mellas*
15. Particle Image Velocimetry Analysis on the Sinking of Shallow Foundation in 2D
by *P. Pizette and N-E. Abriak*
16. Attempt of Simple Calculation on Studying Failure Mechanism of DM Columns
by *B. T. T. Nguyen, T. Takeyama and M. Kitazume*
17. Microzonation of Liquefaction Hazard using Liquefaction Index in Babol City
by *A. Janalizadechoobbasti, M. Naghizadeh rokni, R. Charaty*

Vol. 48 No.4 December 2017

1. Modelling the Effects of Static Shear on the Undrained Cyclic Torsional Simple Shear Behaviour of Liquefiable Sand
By *Gabriele Chiaro, L.I. Nalin De Silva and Junichi Koseki*
2. Numerical Study on the Design of Reinforced Soil by Vertical Micropiles
By *A. Kamura, J. Kim, T. M. Kazama, N. Hikita and S. Konishi*
3. Soil-water Coupled Analysis of Pore Water Pressure Dissipation in Performance Design – Examinations of Effectiveness in Reclaimed Ground
By *Toshihiro Nonaka, Shotaro Yamada and Toshihiro Noda*
4. Comparison of Sheared Granular Soils: Same void ratio but Considerably Different Fabric
By *Y. Fukumoto and S. Ohtsuka*
5. Coupled Analysis of Navier-Stokes and Darcy Flows by the Brinkman Equations
By *S. Arimoto, K. Fujisawa and A. Murakami*
6. Numerical Investigation on Mechanical Behaviour of Natural Barrier in Geological Repository of High-Level Radioactive Waste
By *Y. Kurimoto, Y. L. Xiong, S. Kageyama and F. Zhang*

7. Change of Soil Properties in the Bengawan Solo River Embankment due to Drying–Wetting Cycles
By Trihanyndio Rendy Satrya, Ria Asih Aryani Soemitro, Toshifumi Mukunoki and Indarto
8. Soft Ground Improvement at the Rampal Coal Based Power Plant Connecting Road Project in Bangladesh
By Sudipta Chakraborty, Ripon Hore, Fahim Ahmed and M. A. Ansary
9. Assessment on the effect of fine content and moisture content towards shear strength
By Badee Alshameri , Aziman Madun and Ismail Bakar
10. Ground Response Based Preliminary Microzonation of Kathmandu Valley
By Dipendra Gautam, Hemchandra Chaulagain, Hugo Rodrigues and Hem Raj Shahi
11. Investigation of the Use of Sugarcane Bagasse for Soil Reinforcement in Geotechnical Applications
By V. Oderah and D. Kalumba
12. Quasi-Static Numerical Modelling of an ore Carrier Hold
By S. Daoud, I. Said, S. Ennour and M. Bouassida
13. Shear Strength of an Expansive Overconsolidated Clay Treated with Hydraulic Binders
By A. Mahamedi and M. Khemissa
14. Numerical Modelling of Retaining Wall Resting on Expansive Soil
By Bushra Suhale Al-Busod, Safa Hussain Abid Awn and Hassan Obaid Abbase
15. Simplified Method for Designing Piled Raft Foundation in Sandy Soils
By N. M. Alsanabani, T. O. AL-Refeai and A. O. Alshenawy
16. Stabilization of Seepage Induced Soil Mass Movements using Sand Drains
By R. Ramkrishnan, Karthik, Mukund S. Unnithan, R. Kiran Balaji, M. Athul Vinu and Anju Venugopalan
17. Experimental Study on the Durability of Soil-Cement Columns in Coastal Areas
By Pham Van Ngoc, Brett Turner, Jinsong Huang and Richard Kelly
18. The Change Laws of Strength and Selection of Cement-sand Ratio of Cemented Backfill
By Xiaoming Wei, Changhong Li, Xiaolong Zhou, Baowen Hu, Wanling Li
19. Numerical Modelling of Ground Subsidence at an Underground Coal Gasification Site
By T.C. Ekneligoda, L.T. Yang, D. Wanatowski, A.M. Marshall, and L.R. Stace
