

CONTENTS

Vol. 49 No.1 March 2018

1. Rational Assessment of Modulus of Subgrade Reaction
By Harry G. Poulos
2. Effectiveness of Stone Column Reinforcement for Stabilizing Soft Ground with Reference to Transport Infrastructure
By S. Basack, B. Indraratna, and C. Rujikiatkamjorn
3. Pile Design and Group Behaviour; a Case Study of Large Tank Foundations in Soft Soil Conditions
By W.F. Van Impe, P.O. Van Impe, and A. Manzotti
4. Granular Columns for Geotechnical Applications
By V. Sivakumar
5. Ground Engineering Using Prefabricated Vertical Drains: A Review
By V.A. Sakleshpur, M. Prezzi, and R. Salgado
6. Soil Reinforcement under Oblique Pull – An Updated Discretization
By S. Patra and J.T. Shahu
7. Effect of Facing Slope on the seismic response of Geocell Walls
By Madhavi Latha G. and Manju G. S.
8. Evaluation of Resilient Modulus of Geosynthetic Reinforced Layers Using Repeated Load Triaxial Tests
By Sudheer S. Prabhu, Lekshmi Suku, and G. L. Sivakumar Babu
9. Seismic Analysis of Reinforced Soil Wall considering Oblique Pull-out of Reinforcements: A Review
By Ritwik Nandi and Deepankar Choudhury
10. Characterization of the Soil Samples from the Lonar Crater, India
By Nevin Koshy, S. U. Sushalekshmi, Susmita Sharma, Jeevan Joseph, Vikas Sharma, D. N. Singh, Bhagwanjee Jha, and M. Singh
11. Encased Columnar Inclusions in Soft Grounds – A Review
By J. Jayapal and K. Rajagopal
12. Influence of Shear Stiffness of Geocell Mattress on the Performance of Strip Footings: A Numerical Study
By P. A. Faby Mole, S. Sireesh, and M. R. Madhav
13. Interference of Two Closely-Spaced Footings on Finite Sand Layer
By Macharam Rohith, Sasanka Mouli, and Umashankar Balunaini
14. Stone Columns/Granular Piles for Improving Liquefiable Sites: Case studies
By A. Murali Krishna, A. Madan Kumar, and Utpal Kr. Baruah
15. Biogeotechnological Methods for Mitigation of Liquefaction
By S. Wu, B. Li, J. He, and J. Chu
16. A Critical and Comparative Study on 2D and 3D Analyses of Raft and Piled Raft Foundations
By V. Balakumar, Min Huang, Erwin Oh, and A. S. Balasubramaniam

Vol. 49 No.2 June 2018

1. State-of-the-Art Research in Geo-energy and Geo-environmental Engineering: Energy Pile and Earthen Capillary Landfill Cover System
By Charles W.W. Ng, Jason L. Coe & Anthony Gunawan

2. Validation of a New Simplified Hypothesis B Method for Calculating Consolidation Settlement of Clayey Soils Exhibiting Creep
By J.-H. Yin and W.-Q. Feng
3. Finite Element Analysis to Characterize the Lateral Behaviour of a Capped Pile Group
By Chao-Kuang Hsueh, San-Shyan Lin and Dominic E. L. Ong
4. Proposed Design Guideline of Dynamic Compaction for Practicing Engineers
By Tjie-Liong Gouw
5. Settlement of River Dykes and Their Adjacent Residences on Soft Clay Deposits After the Tohoku-Pacific Ocean Earthquake in 2011
By K. Yasuhara, S. S. Yang, I. Horikawa and H. Yamane
6. Application of Photogrammetry and Image Analysis for Rock Slope Investigation
By D-H. Kim, A. S. Balasubramaniam and I. Gratchev
7. Longitudinal and Transverse Interactions between Stacked Parallel Tunnels Constructed using Shield Tunnelling in Residual Soil
By C.W. Boon and L.H. Ooi
8. Common Blind Spots in Ground Investigation, Design, Construction, Performance Monitoring and Feedbacks in Geotechnical Engineering
By Shaw Shong Liew
9. Detrimental Effects of Lateral Soil Movements on Pile Behaviour
By D.E.L. Ong
10. Optimising Cement Dosage in Ground Improvement and Early Quality Control Schemes
By S.C. Chian
11. Effects of Preloading of Struts on Retaining Structures in Deep Excavations
By Richard N. Hwang and Lup-Wong Wong
12. Anchors of Anchored Slopes in Taiwan
By Hung-Jiun Liao, Shih-Hao Cheng and Chun-Chung Chen
13. Hexagonal Wire Mesh Panel Tensile Behaviour due to Weaving Patterns
By Chiwan Hsieh, Zhi-Yao Cai, and Wen-Shin Shuy
14. Trenchless Excavations for Underground Pipelines in Difficult Geology
By Keh-Jian Shou, Jonas Yen, and Chih-Ying Hsieh
15. Liquefaction-Induced Settlement of Structures on Shallow Foundation
By C.W. Lu, L. Ge, M.C. Chu, and C.T. Chin
16. Evaluation of Failure of Embankment Slope Constructed with Expansive Soils
By Kuo Chieh Chao, Jong Beom Kang and John D. Nelson
17. Strength and Stiffness Parameters of Bangkok clays for Finite Element Analysis
By Suched Likitlersuang, Chhunla Chheng, Chanaton Surarak and Arumugam Balasubramaniam
18. Failure of Riverbank Protection Structure and Remedial Approach
By S. Horpibulsuk, A. Udomchai, M. Hoy, A. Chinkulkijniwat, and D. B. Van
- 19.
20. On Prefabricated Vertical Drain (PVD) and Deep Cement Mixing (DCM) / Stiffened DCM (SDCM) Techniques for Soft Ground Improvement
By D. T. Bergado, P. V. Long, P. Jamsawang, C. Na Lampun, and A.S. Balasubramaniam
21. Study on Shield Operation Method in Soft Ground by Shield Simulation
By Mitsutaka Sugimoto, Hideyuki Tanaka, Ngoc Thi Huynh, Salisa Chaiyaput, Le Gia Lam, and Jian Chen

Vol. 49 No.3 September 2018

1. Strength Characteristics of Soda Waste Treated with Fly Ash and Lime
By Hai-lei Kou and Wen-gang Zhang
2. Groundwater Recharge Estimation in Kathu, Phuket using Groundwater Modelling
By A. Puttiwongrak, K. Sam O. and V. Sakanann
3. Seismic Microzonation of Cox's Bazar Municipal Area Bangladesh
By A. Imtiaz, A. Barua, M. Sakib and M.A. Ansary
4. Geophysical Investigation in Bukit Merah Reservoir
By M. R. Selamat, A. Shafie, R. Saad, and M. M. Nordiana
5. Effect of Ground Disruption on the Strength of Gatch Soil in Kuwait
By Ziad Abdelsalam and Nabil Ismael
6. Greenheart Timber Strip Reinforcement for Reinforced Soil Retaining Walls
By Sean A. Surujdas and C.N.V. Satyanarayana Reddy
7. HWYL Method for Predicting Settlement of Soft Soil
By Yudhi Lastiasih and Herman Wahyudi
8. Bearing Capacity and Settlement Study on Small-Scale Piled-Raft Groups in Sand
By Sengara, IW., Roesyanto, Krisnanto, S., Jayaputra, A. A., and Irsyam, M
9. Influence of Two Rough Parallel Joint Surface Profiles on Stress Wave Energy Dissipation
By Yexue Li, Hongke Pan, Li Qinand Jianhui Fan
10. Failure Mode for Creep Area of High Open-pit Slope Under the Influence of Underground Mining
By Wang Ning, Zhou Xiaolong, Zhu Dengyuan
11. Properties of Desert Sands Reinforced with Ground Tire Rubber in Kuwait
By Nabil Ismael and Hasan Al-Sanad
12. A Study on Behaviour of Vertical Pile in Sand under Uplift Load
By R. Saravanan and P.D. Arumairaj
13. Numerical Simulations of K0 Triaxial Tests on Collapsible Porous Clay
By J.C. Ruge, A. López, F.A. Molina-Gómez, R.P da Cunha and J.E. Colmenares

Vol. 49 No.4 December 2018

1. Analysis of Effect of Reinforcement on Stability of Slopes and Reinforcement Length optimization
By Akshay Kumar Jha, M.R. Madhav, and G.V.N. Reddy
2. Fatigue Performance of Geosynthetic Reinforced Two-Layered Asphalt Concrete Beams
By V. Vinay Kumar and S. Sireesh
3. Deformation Response of Geocells in Pavements under Moving Loads
By Priti Maheshwari and G. L. Sivakumar Babu
4. Effect of Multilayered Geosynthetic Reinforcements on the Response of Foundations Resting on Stone Column-Improved Soft Soil
By K. Deb
5. A Critical Review of the Performance of Geosynthetic-Reinforced Railroad Ballast
By Syed Khaja Karimullah Hussaini, Buddhima Indraratna, and J. S. Vinod
6. Performance of Geosynthetic Reinforced Model Pavements under Repetitive Loading
By K. H. Mamatha, S. V. Dinesh, and B. C. Swamy

7. Lateral Response Analysis of GRS Bridge Abutments under Passive Push
By M. Ramalakshmi and G. R. Dodagoudar
8. Numerical Analysis of Machine Foundation Resting on the Geocell Reinforced Soil Beds
By H. Venkateswarlu and A. Hegde
9. Finite Element Modeling of Embankment Resting on Soft Ground Stabilized with Prefabricated Vertical Drains
By B. Giridhar Rajesh, S. K. Chukka, and A. Dey
10. Effect of Geobags on Water Flow through Capillary Barrier System
By H. Rahardjo, N. Gofar, F. Harnas, and A. Satyanaga
11. Performance of Ballasted Track under Impact Loading and Applications of Recycled Rubber Inclusion
By Sanjay Nimbalkar, Sujit Kumar Dash, and Buddhima Indraratna
12. Probabilistic Stability Analyses of Reinforced Slope Subjected to Strip Loading
By Koushik Halder and Debarghya Chakraborty
13. Advancing the Use of Geosynthetic Clay Liners as Barriers
By J. Scalia IV, C.A. Bareither, and C.D. Shackelford
14. Field and Laboratory Tests on the Bearing Behaviour of Unpaved Roads Reinforced by Different Geosynthetics
By G. Bräu and S. Vogt
15. Performance of nonwoven geotextiles as separators for pavement applications
By Maria P.S. Susunaga, Ennio M. Palmeira, and Gregório L.S. Araújo
16. Geosynthetics Application in Indonesia – A Case Histories
By Tjie-Liong GOUW
