

# CONTENTS

## **Vol. 50 No.2 June 2019**

1. Long-term Deformation Monitoring of CERN Concrete-lined Tunnels using Distributed Fibre-optic Sensing  
*By V. Di Murro, L. Pelecanos, K. Soga, C. Kechavarzi, R.F. Morton, and L. Scibile*
2. Distributed Brillouin Sensing for Geotechnical Infrastructure: Capabilities and Challenge  
*By N. Noether and S. von der Mark*
3. State-of-the Art of Geotechnical Monitoring with Geodetic Techniques  
*By W. Lienhart*
4. Performance Assessment and Failure Prediction of Corroded Cast Iron Pipes  
*By P. Rajeev and D. Robert*
5. Comparative Study of Distributed Sensors for Strain Monitoring of Pipelines  
*By B. Glisic*
6. Instrumented Laterally Loaded Pile Test Using Distributed Fibre Optic Sensors  
*By H. Mohamad, B.P. Tee, M.F. Chong, K.A. Ang, A.S.A. Rashid, and R.A. Abdullah*
7. Distributed Fibre Optic Sensing for Monitoring Reinforced Concrete Piles  
*By C. Kechavarzi, L. Pelecanos, N. de Battista, and K. Soga*
8. State-of-the Art Knowledge on Upheaval Buckling of Buried Pipelines  
*By Indrasenan Thusyanthan and Dilan Robert*
9. Cost Effective Free Span Rectification for Offshore Pipelines  
*By Indrasenan Thusyanthan*
10. Distributed Optical Fiber Sensors for Strain and Deformation Monitoring of Pipelines and Penstocks  
*By D. Inaudi*
11. A Methodology for Identification of Pipe Failure Hotspots  
*By Ravin N Deo, Chunshun Zhang, Jian Ji, Suranji Rathnayaka, Benjamin Shannon, and Jayantha K Kodikara*
12. ADYTrack: Development of a Railroad Trackbed Model and Parametric Study of Track Modulus  
*By Asif Arshid, Ying Huang, and Denver Tolliver*
13. Leakage-induced Pipeline Stressing and its Potential Detection by Distributed Fiber Optic Sensing  
*By A. Klar, A., Linker, R., and Herrmann, S.*
14. Smart Geosynthetics based on Distributed Fiber-optic Sensors in Geotechnical Engineering  
*By A. Wosniok and K. Krebber*
15. Loss of Flexibility in Geosynthetics Subjected to Chemical Exposure: Experiments, Constitutive Models and Computations and Estimates for Contaminant Leakage  
*By A. P.S. Selvadurai*
16. Monitoring of Buried Pipeline using Distributed Fibre Optic Technologies: Combined Acoustic-Temperature-Strain sensing  
*By C. Prohasky, R. Vivekanantham, P.Rajeev, H. Bao, and S. Roy*
17. Benefits of Standards for Fiber-optic Sensors in Soil-structure Interaction  
*By W. R. Habel and J. K. Jeyapalan*
18. Rational Methods of Steel Pipe Design Accounting for Poor Native Soils and Soil Migration  
*By J. K. Jeyapalan, G. Leonhardt, P. Rajeev, and A. M. Britto*

19. Technical Challenges and Solutions for Super-Long Mountainous Tunnels at Great Depth  
*By Yan Jinxiu*
20. Risk Analysis and Countermeasure Study of Shield Tunnelling in Karst Stratum of China  
*By Zhong Changping, Zhu Weibin, Huang Weiran, Zhu Siran, and Xu Minghu*
