

PAPERS

1. Construction Technologies for Gaoligongshan Tunnel on Dali-Ruili Railway
By: Hong Kairong
2. Three-dimensional Interaction Mechanisms: Twin Tunnels and Pile Foundation; and Basement Excavation and Existing Tunnel
By: Charles W.W. Ng
3. The Technical Innovations and Practice in Island and Tunnel Engineering Works of Hong Kong – Zhuhai – Macau Bridge Project
By: Lin Ming
4. Construction Experience of Long Large Tunnels under Complex Geological Conditions in Southwest Mountainous Area in China
By: Chen Debin
5. Design Method of Support Structure for Underground Station with a Lot of Caves and a Large Span
By: Lu Gang
6. Risk Analysis and Countermeasure Study of Shield Tunnelling at Karst Stratum in China
By: Zhong Changping
7. Design Management of Single Largest Underground Construction Contract in Malaysia – A Client's Perspective
By: Poh Seng Tiok
8. Advances in Tunnel and Underground Construction Technology
By: Leslie J. Pakianathan
9. A Leap in Tunnel Boring Technology; the Variable Density Slurry TBM
By: Gus Klados
10. Review of Interfaces between Railway Infrastructures and Adjacent Developments, Singaporean and Malaysian Perspectives
By: ONG Chee Wee, Victor
11. Challenging Geological Conditions in Kuala Lumpur and Its Impact to Underground Space Developments
By: Ng Chew Chiat, David
12. The Challenges of Diaphragm Wall Construction in Complex Geology
By: Ooi Lean Hock
13. Ground Response Due to Underground Construction and Impact to 3rd Party Structures
By: Boon Chia Weng
14. Geotechnical Challenges in the Design and Construction of Singapore Land Transport Underground Infrastructure
By: Jeyatharan Kumarasamy
15. Technical Challenges of Super-Long Mountainous Tunnels at Great Depth
By: YAN Jinxiu
16. Multifunctional Energy-Storage and Luminescent Material for Sustainable and Energy-saving Lighting for Tunnels
By: Feng Shouzhong
17. How Innovative Engineering Equipment Promotes Underground Space Development
By: Zhiguo Zhang
18. Challenges and Advances in Tunnelling in Malaysia
By: Ooi Teik Aun
